

MYCOM

Ammonia Dry

Environment Friendly

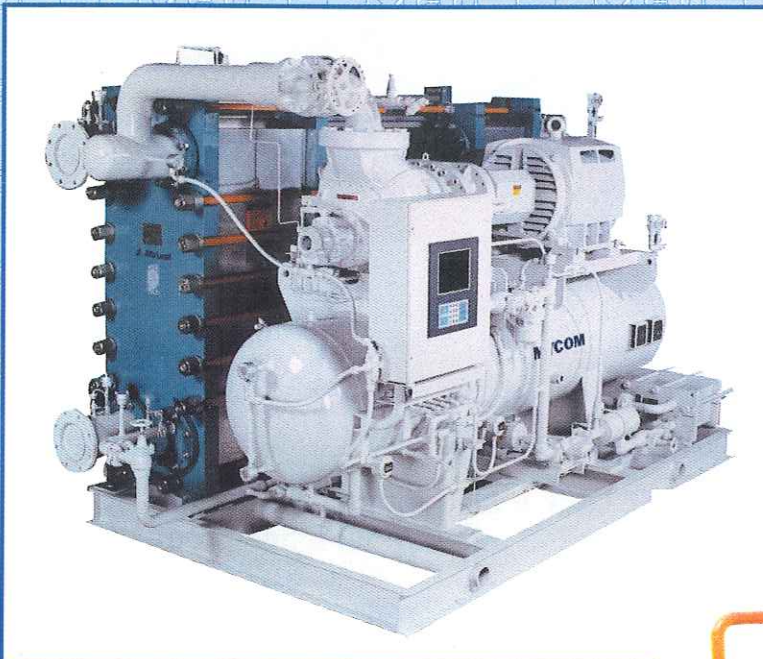

- ◆ Ozone depletion potential of zero
- ◆ Global warming potential of zero

For:

Process Freezing,
Process Cooling &
Air Conditioning
Systems

Direct Expansion System

Mycom's Patented System

Ammonia (-65°C to 10°C) has a greater evaporating temperature range usage than CO₂.

Most valves and control equipment are suitable for Ammonia pressure ratings but are not suitable for CO₂.

**Immensely
reduced
Ammonia Charge**

**As little as 1/50th of the
Ammonia charge as in
a conventional system**

Performance is its advantage.
Zero impact on the environment
is your gain.
